

What's next at work

Exploring the big trends impacting our workplaces

Our workplaces are incredibly busy and it's therefore easy to get out of touch with the latest trends affecting workplaces more broadly.

This session aims to bring you up to speed quickly with the emerging trends from across the world by distilling workplace insights from the 2018 International Society for Industrial and Organisational Psychology Conference recently held in Chicago.

In this workshop you will gain insight into 8 trends currently impacting workplaces worldwide, including gamification, agility and incivility and give you the opportunity to reflect on and discuss how they may play out in your organisation.

This session is essential for anyone keen to remain ahead of the waves of change sweeping across our workplaces at an ever increasing rate.
