

Driving Performance Through Accelerated Trust

Successful teamwork is built on a foundation of trust. As an essential element in team productivity, when trust is in place each individual in the team becomes stronger. Without trust, regardless of how capable or talented your people are, they may never reach their full potential.

Through this session, participants will:

- Understand what trust is and is not
- Understand the individuality of trust as a personality variable
- Reflect on their personal levels of trust
- Explore the importance of trust within organisations and teams
- Devise strategies to accelerate trust within their teams and organisations

This interactive session will enable participants to understand the role trust plays in the development and performance of effective teams. We will provide the opportunity for leaders to explore how their team can build the trust it needs to flourish.
